

# Special Stitch Photo Tutorial

- 1-2 This is the right side of your work. Knit 2 stitches together, but don't slide the stitches off the left needle.
- 3-5 Insert right needle into the first stitch on the left needle as if to knit like normal. (Just forget that you have down step 1) Knit this one stitch.
- 6 Slide the two stitches off the left needle.

**Done! It really is that easy. This forms a little twist in your work that looks like a mini cable.**
